INTRODUCTION ▼

PrismMMS is a merchandising management system which is delivered to cater the solutions of garments business as well as for buying house industry. Starting from sample development to delivery & shipment of products, the entire process is executed seamlessly. The documentation, commercial and maintaining compliance are monitored in real time while dispatching data accordingly. The application aids in pre-defining responsibilities making it easier to meet the targeted demands of a buying house business.

Strong reporting system of the application aids in understanding the overview of business which includes customer wise business history, sample development cycle, employee activity record, and history of delivered products.
