The History of ERP & PrismERP

ERP Software Solutions weren't always offered and available for small & Medium Enterprises. They started off as expensive legacy systems, primarily focused on inventory managment & manufacturing requirements.Take a look at the evolution of the ERP system -

1960s

Centralized Computing System

During the 60s large enterprises implemented 'centralized computing system' to manage the inventories

1970s

The Emergence of MRP

Material Requirement Planning systems were built to improve requirements planning during production processes

1980s

MRP II - Manufacturing Resource Planning

The initial MRP was evolved into a more optimized manufacturing process. The system was further embellished with HR, Finance, Distribution Management and Project Management functionalities

1990s

Introduction of ERP system

The first ERP system had inter functional integration. The system integrated business processees such as manufacturing, distribution, accounting, finance, inventory, HR, project management, service and transportation

2000s

ERP II - The 21st Century ERP

During the 2000s, various ERP Add-ons were initiated such as CRM, eCommerce solutions, Supply Chain Management, Advanced Planning, Business Intelligence and so on

2007 — prismERP v1.0
Web based platfrom
Independent ERP
with core modules

2009 — prismERP v2.0
Modular Architecture
ERP II modules

2010s

2013 — prismERP v3.0
BI Tools introduced, SOA & API Layer opened gateway for integration

2016 — prismERP v4.0
Redesigned Modules, PoS, E-commerce intergration, New MRP II Engine

Postmodern ERP

Postmodern ERP is a technology strategy intended to automate administrative and operational business capabilities (such as finance, manufacturing & distribution) with varied level integration balancing cost and flexibility

2020

INTRODUCING prismERP v5.0 — Comprehenive Pricing Model, Reimagined UI, Single Sign on, Data Warehousing, Re-engineered Modules, Dynamic Import/Export, Extensive Backup & Recovery Services
